

# The Secrets to Effective Computer-Based Training Design

LIVE INTERACTIVE ONLINE EVENT

Can computer-based training (CBT) really contribute to improved performance, or is it just a way to cut costs? The answer depends: How well does your organization leverage this technology? What is the quality of the design process?

CBT can be an important part of an effective training and development program that improves performance and provides real value to the organization and participant.

This webinar will explore the myths and realities of CBT, when CBT is effective, and a design process for creating courses that are both engaging and effective at improving performance.

## Target Audience

This workshop is intended for professionals responsible for any and all aspects of learning and performance in the corrections field.

## Presenter

Joe Brodnicki is a veteran of the Southern Regional Training Initiative and an e-learning designer and developer for the Tennessee Department of Correction. He has several certifications in scenario-based e-learning design and using Articulate Storyline as an e-learning development tool.

## Training Date/Time

Wednesday July 31, 2013  
11:00 a.m. Eastern Time
